

## TECHNICAL DATA SHEET

### PHYSICO-CHEMICAL CHARACTERISTICS

Composition	: Potassium thiosulphate in solution as essential component
Formula	: $K_2S_2O_3$
Appearance	: Clear colourless or pale yellow liquid
Density (20°C)	: 1.47 kg/dm <sup>3</sup> approx.
pH (20°C, as it is)	: 8.0 approx.
Crystallisation temperature	: 0°C approx.
Compatibility	: It mixes easily with most liquid fertilisers and liquid micronutrients fertilisers. It can be applied together with many of herbicides. Blending with strong acids and anhydrous ammonia should be avoided.
Water miscibility	: 100%

### QUALITATIVE CHARACTERISTICS

#### STRAIGHT INORGANIC FLUID FERTILIZER

Potassium thiosulphate solution	<u>Assay</u>	<u>Tolerance</u>
Composition	% w/w	% w/w
Potassium oxide (K <sub>2</sub> O) soluble in water	25.0	- 1.0
Sulphur trioxide (SO <sub>3</sub> ) from thiosulphate	39.5	- 0.9
Sulphur trioxide (SO <sub>3</sub> ) soluble in water	42.0	- 0.9

The values are intended as determined according to our standard analysis methods.

### STANDARD PACKAGING

300 kg net polyethylene drums, 1300 and 1450 kg net IBC  
 Rail and road tankers, according to transport regulations

### STORAGE AND HANDLING

Being non-corrosive, the product can be stored in mild steel or aluminium containers, as well as in any type of storage used for fluid fertilisers. As with all other fertilizer solutions, it should not be allowed to contact with tin, copper, brass or other alloys.

### AGRICULTURAL USES

SECOFIT K is high analysis potassium and sulphur fertiliser; it may be applied alone or blended with fluid formulations to increase the S and K content.

Excellent source of potassium for chloride sensitive crops.

Source of potassium and sulphur for drip irrigation, it does not plug drip line.

FOR HANDLING INFORMATION PLEASE CONSULT THE SAFETY DATA SHEET.
